

# Design Christmas balls with transfer foil

Instructions No. 3134

Difficulty: Beginner

Working time: 1 hour

Christmas is just around the corner and you want to make your own **tree decorations** this year? With these detailed instructions, I'll show you how to **create customised Christmas balls**. With the help of transfer foil, you can easily transfer your favourite motifs onto smooth surfaces. Your Christmas tree and decorations will not only be unique, but also a real eye-catcher. Let's get started!

Once you have transferred the motif to the Christmas bauble, leave it to dry overnight. This will ensure that the motif adheres firmly and that you can enjoy your self-designed Christmas decoration for a long time.

### Extra tip: Cleaning the stamps

Don't forget to clean your silicone stamps thoroughly after use. A special stamp cleaner helps to remove the colour residue so that your stamps are as good as new the next time you use them.

Crafting for Christmas is a wonderful way to get creative and create personalised gifts at the same time. I hope these instructions have inspired you and shown you how easy it is to create impressive Christmas balls. Have fun making them!

## Must Have

Christmas balls made of plastic, 18 pieces, Red-Glossy

6,99 €
