

Engel aus Bändern

Instructions No. 2043

Difficulty: Beginner

Working time: 30 Minutes

The small Christmas angels made of ribbon are a great eye-catcher on your Christmas tree or on a gift. Crafting is fun and requires little only time.

For each angel you need 2 ribbon blanks of 10 cm length and 2 blanks of 15 cm length

For the **body**, the two longer pieces **are** placed on top of each other, folded once, gathered a little, and the ends are glued together with some hot glue. For the **wings**, the two shorter pieces are also laid on top of each other, glued together with hot glue and shirred

Remove the plug wire for the head **from** the foil ball. This is best done with pliers. Put some hot glue into the hole and insert the gathered end of the "loop tape body". Now glue the wings to the back of the body

For the **halo** you need an approx. 10 cm long piece of wire. Modelling Make a small circle in the shape of the halo and glue it to the back of the angel with the rest of the wire.
